

FISITA PLUS

Exploring the future of mobility engineering A one-day conference for mobility technologists and professionals 13 July 2017, County Hall, London, United Kingdom

For the first time, FISITA will open its door to a new audience with the launch of our maiden FISITA PLUS event. This will showcase the very best presentations from our international community in an open and collaborative environment, in order to support this engineering generation's development of safe, sustainable and affordable mobility.

The Agenda

On the day, nine guest speakers, hand-picked by the FISITA Executive Team will deliver their 'real-world' perspective on future mobility at County Hall in London. We welcome a prestigious presenter line-up from some of the world's leading mobility companies:

Speakers will present under the headings of:

- **The Mobility Future**
- **Artificial Intelligence and Mobility Technology**
- **Propulsion of the Future**

The day will commence with a video welcome from FISITA President, Dan Nicholson, VP Global Propulsion Systems at General Motors, live from GM's Technical Centre in Pontiac, Michigan.

The Leadership Interview hosted by Paul Mascarenas will be the centre-piece of the conference, featuring Ford's former CTO and current independent director, business advisor and technology executive, in

discussion with Jon Lauckner, Chief Technology Officer and VP of R&D at General Motors.

The day's technology focus will culminate with a headline speech by Andy Palmer, Vehicle Line Director at McLaren Automotive Ltd. Andy, who is responsible for new vehicle development for one of the world's most recognised and aspirational brands, will deliver an insight into what drives McLaren Automotive and how they reflect their people's passion and energy into shaping the future.
