

➤ CALL FOR PAPERS

International Conference and Exhibition

SIA POWERTRAIN PARIS 2023

Powertrain solutions for urban and regional mobility for passenger cars and commercial vehicles

Deadline for
abstracts
submission
**4 NOVEMBER
2022**

SAVE THE DATE!
14-15 JUNE 2023

PORT-MARLY - FRANCE

With the support of:

The automotive industry is undergoing an unprecedented transformation due to the energy transition and its impact on society. Powertrain technologies are nowadays key to support this transformation while responding to the evolution of mobility needs.

To be successfully implemented, powertrain technologies must be embedded in the ecosystem formed by the production and distribution of electricity and future fuels. In addition to the energy aspects, the resource depletion issue must be addressed as early as the design stage.

The introduction of new technologies in the automotive context has triggered a profound transformation of the industry's value chain, leading to numerous collective ventures and collaborative projects supported by public authorities.

The 35th SIA POWERTRAIN // Paris 2023 conference will address the full spectrum of electric and hybrid drivetrain technologies with special focus on urban and regional mobility for passenger cars and commercial vehicles.

SIA POWERTRAIN is recognized by automotive stakeholders as an exceptional and unique technical event. The status and first outcome of the main collaborative projects are expected to be shared there.

After an entirely digital version in 2021, which nevertheless gathered 520 participants, the 2023 edition will be the opportunity to meet many participants and exhibitors on site.

Finally, members of the Organizing Committee would like to invite all the powertrain engineering and scientific communities to submit abstracts on any of the related conference topics.

We look forward to welcoming you in Paris in June 2023!

TOPICS TO BE ADDRESSED

- › Low carbon automotive propulsion systems
- › Electric machines & power electronics
- › Batteries & systems
- › New mobility ecosystem including energy supply
- › Eco-design solutions for circular economy

SIA POWERTRAIN PARIS 2023

**SUBMISSION
DEADLINE
4 NOVEMBER 2022**

**To be sent back to
martin.pierrelee@sia.fr**

Speakers will be allocated 25 minutes each (20 minutes for presentation and 5 minutes for questions).

All necessary instructions for the preparation of the paper will be sent to the authors after selection.

The lead author (one per paper) will benefit a free access to the conference and meals, 2 co-authors max will benefit from a discount.

- › Conference language: **ENGLISH**
- › Proposals for papers must reach us by **04 November 2022**.
- › Successful authors commit themselves to produce a **Full Paper (6-8 pages)** for inclusion in the conference proceedings. Final PPT presentations must be sent to the SIA.
